Color printing with exceptional paper handling flexibility

Digital color printers from OKI Printing Solutions provide high-quality, tabloid-extra (12" x 18") color output.

With the C9600 Series Digital Color printers, you can improve the quality of your output and increase productivity—even as you lower your expenses.

These color printers are the efficient and affordable answer, especially if tabloid-size newsletters and brochures, ad layouts, large illustrations, banners or specialty media are essential parts of your business.

Your total in-house printing solution.

No more having to run down to the corporate or neighborhood copy center every time you need color documents. From postcard- to banner-size documents up to 12.9" by 47.24", you can simply print them in-house.

C9600 Series printers come with Color Matching software from OKI Printing Solutions and Auto Color Balance, to ensure that color output remains accurate and consistent from start to finish. And features like Auto Media Detect will automatically adjust the printer to your required media type.

Single Pass Color™ Digital technology and long-lasting, individually replaceable toner cartridges and image drums translate into fewer interventions—for increased productivity and a lower cost per page than competitive color printers and, especially, outside print-and-copy services. Further, C9600 Series color printers have a cost per black & white page comparable to that of most mono laser printers—so you can use them for all your business printing.

Connectivity and more.

C9600 Series printers can be connected to the network (PC- or Mac®-based) via a 10/100 Base-T internal print server card or an optional wireless network interface card. They also feature high-speed USB v2.0 and parallel interfaces.

Both C9600 Series models are equipped with Job Accounting software² that allows for tracking of color and mono pages, the types and quantities of paper used, and a record of printing activity by individual or department.

So go on, get as creative as you like—and expect the superlative capabilities of C9600 Series Digital Color printers from OKI Printing Solutions to make you look great.

¹ Published performance results based on laboratory testing. Individual results may vary.

Productivity- and profit-enhancing software utilities, too.

PrintSuperVision

Robust, scalable, Internet-based software components that enable administrators to access and distribute printer data and control the functionality of all the OKI Printing Solutions printers and most other SNMP-based printers on their network.

Job Accounting Software

Enables tracking of color printing costs and easy monitoring and control of printer usage—with both Server and Client components.

Color Matching software from OKI Printing Solutions

An accurate color matching/job flow management program that enables users to match the colors on their monitor with their color output, and create ICC input/output profiles for printers, monitors and scanners.

C9600 Series At-a-Glance

The easy-to-read, easily accessible operator panel of the C9600 Series tilts up for user convenience, and features a bright text-and-graphics LCD display.

C9600 Series Operator Panel in “flat” or “down” position.

C9600 Series Operator Panel can be tilted upwards to various angles (up to 90°) for greater convenience.
